DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 10 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Nishida et al. (US patent 6,461,934).

With respect to claim 10, Nishida et al. teach an integrated circuit comprising (see figs. 1-5 and associated text):

- a semiconductor structure 101 or substrate;
- a first trench 103b formed of a first depth in said semiconductor structure;
- a covering 106 on said first trench and over said semiconductor structure,

said covering being thicker in said first trench than over said semiconductor

structure; and

said covering having an opening through a portion of said covering that is over said semiconductor structure, said opening to define a region for a second trench.

With respect to claim 16, Nishida et al. further teach the opening is a second trench. See figs. 1-5.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2814

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 11, 17, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishida et al. (US patent 6,461,934) in combination with Wen et al (US patent 5,460,987).

With respect to claim 11, Nishida et al. fail to teach that the covering is made of spin-on-glass material.

However, the use of spin-on-glass as covering material is well-known in the art.

With respect to claims 17 and 18, Nishida et al. fail to teach that opening for forming a second trench extends transversely or the opening for forming the second trench crosses the first trench and the second trench is shallower than the first trench.

Wen et al. teach forming a second trench crossing a first trench and the second trench is shallower than the first trench. See figs. 1-8 and associated text.

It would have been obvious to one of ordinary skill in the art of making semiconductor devices to incorporate the above teaching of Wen et al. into the device of Nishida et al. to reduce leakage current for the structure. See the abstract.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Long Pham whose telephone number is 571-272-1714. The examiner can normally be reached on Mon-Frid, 10am to 5pm.

Application/Control Number: 10/822,361 Page 4

Art Unit: 2814

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on 571-272-1705. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
